

EduBridge

B2B EdTech Marketplace — PM Portfolio

A platform connecting schools with verified edtech vendors — enabling discovery, demo scheduling, procurement, and contract management in one place. Built on real field insights from 30+ school visits across Pune.

Prepared by: Rohan Shaw | PGDM (Marketing) — ISMS TBS

MARKET SNAPSHOT

1.5M+ Schools addressable in India	4,000+ Active edtech vendors	4–6 months Avg. procurement cycle	3–4 weeks Target with EduBridge
--	--	---	---

The Problem — from ground research

During field sales at Gray Quest, visiting 30+ schools in Pune revealed a clear pattern: school principals had no reliable way to discover, compare, or evaluate edtech vendors. Vendors spent months cold-visiting schools one by one. There was no central discovery layer just referrals, cold calls, and expensive trade fairs. EduBridge solves this for both sides.

PRODUCT REQUIREMENTS DOCUMENT (PRD) — V1.0

Problem Statement

Schools spend 4–6 months evaluating edtech solutions through unstructured processes: cold calls, trade fairs, word-of-mouth. Edtech vendors waste 60–70% of sales rep time on cold prospecting. There is no trusted neutral platform for discovery, comparison, and verified procurement.

Goals & Success Criteria (OKRs)

- Reduce school vendor discovery time from 4 months to 2 weeks
- Onboard 200 verified edtech vendors in 6 months post-launch
- Achieve 500 school sign-ups in the first quarter
- 30% of school–vendor connections lead to a demo request
- Pilot GMV target: Rs. 50 lakh in transactions in Year 1

School-side Features (Buyer) • Vendor discovery with category filters • Verified profiles with case studies & reviews • One-click demo scheduling • RFP builder & proposal inbox • Procurement tracker & contract storage	Vendor-side Features (Seller) • Profile & product catalogue builder • Lead inbox with intent signals • Demo calendar management • Proposal templates & e-sign • Analytics: profile views, demo rate
--	--

Assumptions & Risks

- Risk: Schools have low digitisation — mitigation: WhatsApp onboarding + phone support
- Risk: Vendors bypass platform after first connection — mitigation: value-add in contract management
- Risk: Trust deficit between schools & unknown vendors — mitigation: verification badges, reviews
- Assumption: Schools will pay for premium shortlist feature (Rs. 2,000–5,000/yr)

USER RESEARCH — PERSONAS

PA Principal / Admin Head

Decision maker · Private school (200–800 students) · Pune / Tier-2 India

- Gets 5–10 cold vendor calls/week — no way to compare or shortlist efficiently
- No budget for trade fairs, relies on peer referrals
- Afraid of committing to a vendor without peer validation
- JTBD: "Find a trusted, affordable LMS in under 2 weeks"

SR Edtech Sales Rep

Operator · SMB edtech vendor · 5–50 person company

- Spends 60% of time on cold prospecting with low conversion
- No visibility into which schools are actively looking
- Loses deals because schools cannot verify credibility
- JTBD: "Get warm inbound leads from schools ready to buy"

KEY RESEARCH INSIGHTS

The trust gap is the core problem

School decision-makers distrust unknown vendors, not technology. 8/10 principals interviewed said they would only buy from a vendor a trusted peer recommended. EduBridge's verification layer and review system directly address this.

Vendors want intent signals, not more reach

Sales reps said the biggest pain was not finding school contacts — it was knowing which schools were actively looking. A lead with intent signal is worth 10x a cold contact.

WhatsApp is the real CRM for schools

Most school admins manage vendor conversations via WhatsApp groups. Any platform must integrate or mirror this workflow to get adoption.

PRODUCT ROADMAP — 18 MONTHS

Phase 1 — MVP (0–6 months)

M1–2	Vendor onboarding & profile builder	Verified profiles, category tagging, document upload
M2–3	School discovery & search	Filter by category, budget, board type, city
M3–4	Demo scheduling engine	Calendar sync, reminders, video link generation
M5–6	Review & ratings system	Verified school reviews, vendor responses

Phase 2 — Growth (6–12 months)

M7–8	RFP builder	Schools post requirements; vendors respond with proposals
M8–9	Intent signals for vendors	Profile view alerts, shortlist notifications
M10–12	WhatsApp integration	Lead notifications & demo confirmations via WA Business API

Phase 3 — Scale (12–18 months)

M13–15	Contract management & e-sign	Proposal to contract to e-sign in-platform
M15–18	Premium tiers & subscriptions	Freemium to Pro, sponsored placements, priority routing

METRICS DASHBOARD

NORTH STAR METRIC

Verified connections leading to a demo

Captures value for both sides — school found a vendor, vendor got a qualified lead.

KPI	Target	Progress
Monthly Active Schools	Target: 500 by Q1	72%
Demo Conversion Rate	Target: 30% connection > demo	30%
Vendor Profile Completion	Target: 80% complete profiles	65%
Demo-to-Proposal Rate	Target: 50% demo > proposal sent	42%
Monthly GMV	Target: Rs. 10L/month by M12	Rs. 5.5L
Review Submission Rate	Target: 25% of completed demos	28%
